The Cai Mep Ha Logistics Center project will be implemented through Bidding
Updated: 20:11, September 16, 2019 (GMT + 7)

On September 16, Mr. Le Tuan Quoc, Vice Chairman of the Provincial People's Committee chaired the meeting to listen to the Department of Transport and The Joint Venture of Nippon Koei Co., Ltd. (NK), Nippon Koei Vietnam International Co., Ltd. (NKV) and Portcoast Consultant Corporation (Portcoast) making the presentation of Planning tasks for Zoning Plan Preparation on the scale of 1/2000 for Cai Mep Ha Logistics Center.

The overall development of logistics services has been planned by the province covering an area of 1,000 hectares with the estimated total investment of about VND 30,390 billion. Of which, logistics center covers an area of about 800ha in Low Cai Mep area for the purpose of developing this area to become a national and international transshipment hub.

The reports propose a planning plan for Logistics Center, some contents related to surrounding works such as roads, clean energy centers, seaports. Particularly for seaports, the JV consultant proposes 2 new construction options: realigning berth lines moving toward the sea in order to achieve better depth, reduce dredging volume and dredging maintenance works and jetty/finger pier.

Making conclusion at the meeting, Mr. Le Tuan Quoc noted that the JV consultant should limit the leveling and backfill of rivers and canals in order to preserve space for the surrounding inland waterway port development. Mr. Le Tuan Quoc informed the Standing Committee of the Provincial Party Committee has agreed that the Cai Mep Ha Logistic Center project will select investors through Bidding. The province will give priority to large and competent investors to implement the project. Therefore, it is required that the JV consultant urgently work with relevant departments and agencies to seek for the agreement on the location of the energy center to update into the project.
